

Plains Archaeology Field School May 5-June 12, 2024

Department of Anthropology and Archaeology
Contact: Dr. Lindsay Amundsen-Meyer (lmamunds@ucalgary.ca)

UNIVERSITY OF
CALGARY

Calgary's Edworthy Park

- Pending permission from the City of Calgary, the field school will take place within Calgary's Edworthy Park.
- Edworthy Park is located in southwest Calgary, on the west side of the City south of the Bow River. Only a few archaeological sites are known within the park, due to limited development here.
- Students will have the opportunity to work with our Indigenous partners and community members during the excavations, and to experience cultural traditions and ceremonies necessary for these excavations to occur.

On site teachings from Elder Clement Leather (2023).

Archaeology in Edworthy Park

- Students will test and excavate at a Precontact campsite (EgPm-250), where a large stone circle is present. Excavations will focus on areas outside and adjacent to the stone circle.
- Students will document ongoing erosion at the historic of Brickburn, an industrial village and brickworks in the western portion of the park. This site continues to be impacted by river erosion and illegal looting.
- Students will participate in an archaeological survey of portions of Edworthy Park, to create an inventory of sites present in the park.

2024 Field School Excavations, EgPm-143 (Nose Hill Park)

Course Information

ARKY 306 and ARKY 506

Field Course in Archaeological Field Techniques

Instructor: Dr. Lindsay Amundsen-Meyer
Lecture/Practical (7 hours/day on site plus travel time, 5 days/week)

Cost

- The cost of the course is the standard six credit course fee plus a \$1150 supplemental field fee (TBC).* Visit www.ucalgary.ca for course fee information.

**The University of Calgary retains the right to change the fee structure without notice.*

Credit

- ARKY 306 is a 1.0 full course credit. The course counts as a 0.5 full course equivalent for the Archaeological Techniques portion of the Major Field Requirement.
 - ARKY 506 is a 1.0 full course credit
- **ARKY majors prioritized for registration until January 15, 2025.**

Course Description

Our field school aims to provide students with transferable skills useful across disciplines, increase their understanding of Indigenous worldviews and current realities, and provide real-world archaeological training useful in industry and academic settings. Students will gain experience in all aspects of archaeological survey and excavation and participate in an active archaeological research program.

Course Learning Outcomes:

By the end of this course, students will be able to:

1. Understand and apply Northwestern Plains cultural historical schemes
2. Relate principles of Indigenous knowledge to the field of archaeology while working effectively as archaeological field crew in academic and industry contexts
3. Generate strategies and approaches for engaging Indigenous community partners and reconciling Indigenous and Canadian relations
4. Recognize basic artifacts, raw materials, and form types and be able to apply that knowledge to artifact cataloguing

Field school excavations at EgPm-143 (Nose Hill), 2024

Logistics and Preparation

- Field school runs Monday-Friday (with the exception of statutory holidays). The first week of field school will be on campus from 8:00 am to 4:00 pm. Following this, class will be held from 8:00 am to 4:00 pm on site in Edworthy Park (weather permitting). The final week of class will be spent in the Alberta Heritage Project lab (8:00 am to 4:00 pm). Students must be prepared to allow weather or other logistics to alter this general schedule.
- A van will provide transportation to and from Edworthy Park, on the west side of the City of Calgary. Students must be at the meeting place on campus at 8:00 am for departure and should expect to return at approximately 4:00 pm
- Archaeological excavation is physical demanding - students should be prepared for physical exertion on field days. All participants must bring their own food, drinks and appropriate clothing. The class is primarily an outdoor activity and students must be prepared to take care of themselves in the field.

Field School Students and Staff in Nose Hill Park (2024)
