Sharif-Razi, M., Hodgins, D.C., & Goghari, V.M. (in press). Proactive and reactive mechanisms of response inhibition in gambling disorder. *Psychiatry Research*. doi: 10.1016/j.psychres.2018.12.049

Response inhibition, one component of cognitive control, refers to the ability to inhibit automatic responses and has been found to be impaired in gambling disorder. Recent models of cognitive control distinguish between two mechanisms: reactive control, the ability to stop in response to a stop-stimulus, and proactive control, the ability to anticipate and prepare for a stop. Previous studies have primarily focused on reactive modes of control in gambling disorder. The aim of the current study was to assess both reactive and proactive modes of response inhibition in individuals with gambling disorder ($n = 27$) and community controls ($n = 21$) using a variant of the stop-signal task. Second, the relationship between trait impulsivity, and reactive and proactive control was examined.

VOLUNTEER AND JOB POSTINGS

The Faculty of Arts and Science at Queen's University is pleased to invite applications for **one-year Pre-Doctoral Fellowships for Indigenous Students**. The Fellowships are open to Indigenous students enrolled in a PhD program and working on doctoral research in Arts or Science at an accredited university other than Queen's University. Candidates must have completed all degree requirements except the final doctoral project (e.g. dissertation) and will be expected to complete their doctoral work during the Fellowship.

Application Deadline: April 01, 2019. Register for a Webinar, join us for a 30-minute webinar for more information. **Thurs., February 14, 12:00 pm EST or Thurs., March 07, 12:00 pm EST.** To learn more or register for a webinar visit QUartsci.com/predocs.

VOLUNTEER AND JOB OPPORTUNITIES Continued...

The [Department of Psychological and Brain Sciences](#) at the University of Iowa invites applications for a clinical-track faculty position at the rank of Clinical Assistant or Associate Professor. We are searching for a clinical psychologist to contribute to our clinical science doctoral program. This position entails the teaching of core clinical undergraduate and graduate courses and other clinical didactics, supervision of assessment and psychotherapy cases within the [Seashore Psychology Clinic](#), the provision of psychological services, and other related activities. There will also be opportunities to participate in research. Candidates should have experience implementing evidenced-based approaches to assessment and psychotherapy and with teaching and supervising graduate trainees in clinical psychology.

Materials should be submitted electronically, including a letter of interest, curriculum vitae, statement summarizing teaching and clinical supervisory experience and philosophy, statement of clinical orientation and approach, and email contact information for three letters of recommendation. Informal inquiries about the position can be directed to the department chair, Mark Blumberg, at mark-blumberg@uiowa.edu. Screening of applicants will begin on February 15, 2019 and will continue until position is filled and appointments will begin on or about August 21, 2019. The initial term for this non-tenure-track appointment will be three years with the expectation of reappointment given satisfactory performance. Candidates must have a Ph.D. at the time of appointment and be licensed or license-eligible in the state of Iowa. The University of Iowa is a leading public university located in Iowa City, a midsize community with a high quality of life. The Department of Psychological and Brain Sciences is experiencing vigorous growth and enhancement, including construction of a new building

The College of Science within the University of Canterbury (UC) is seeking to appoint an exceptional academic leader to provide strategic leadership to the newly created School of Psychology, Speech and Hearing. The Head of School will drive the continued development of excellence in research and teaching, while establishing and implementing an innovative and bold vision aligned to UC's new strategic objectives.

The School of Psychology, Speech and Hearing has been created by joining the two Departments of Psychology and Communication Disorders and will include an estimated total of 802 equivalent full-time students and approximately 65.9 full-time equivalent staff. The Psychology Department currently offers courses from introductory psychology to PhD level, including nationally and internationally recognised applied programmes in Clinical Psychology and in Industrial & Organisational Psychology. The Department of Communication Disorders provides accredited programmes in speech-language therapy and audiology, as well as research and public services. The Speech-Language Therapy programme is the longest running of its kind in the country. For more information about the University and the Departments visit www.canterbury.ac.nz. To apply in confidence, please go to fisherleadership.com and click "APPLY ONLINE" using reference UCAppsh0119 and include your cover letter and full curriculum vitae; or for a confidential discussion call or Kirsten Henderson on +64 9 282 4240.
Applications close: Friday, March 22, 2019

Are you interested in a fun and exciting volunteer opportunity? Come join us at **Calgary Brain Waves!**

Brain Waves is an event sponsored by Parachute Canada designed to educate students in grades 4-6 about brain safety and promote awareness. We will be sending groups of 2-3 volunteers to visit various classrooms in the Calgary community where they will give an approximately 2 hour presentation to the students. The content for the presentation will be provided - students will be given a workbook to go through as you present - we will provide you with the information they will need to complete this booklet as well as suggested activities to use during each section. The necessary materials for activities will be provided.

Presentations will be held between the dates of **March 11 to March 22** and will be 3 hours in length. Please fill out this [form](#) if you are interested: If you have any questions please feel free to contact us at calgarybrainwaves@gmail.com

l'Université de Moncton is seeking an interdisciplinary research chair in children and youth mental health. For more [details](#).

The **Department of Psychology** at the **University of Regina** is seeking applications for a **2-year term position in Neuropsychology at the rank of Assistant Professor**. The successful candidate will have a PhD in Neuropsychology or Neuroscience. Area of research specialization is open for this position. Anticipated date of commencement is July 1, 2019, depending on the availability of the successful candidate.

Duties of the successful applicant will include a combination of the following: teaching at the undergraduate & graduate level, honours & graduate thesis supervision or co-supervision, and participation in departmental activities. We are specifically seeking candidates who can teach some of the following courses: Neuropsychological Assessment and Basic Neuroscience. Review of applications will begin **March 15, 2019** and will continue until the position is filled. For more [information](#).

The **Department of Psychology** at the **University of Regina** is seeking applications for a **1-year term position in Clinical Psychology at the rank of Assistant Professor**. The successful candidate will have a PhD in Clinical Psychology from a CPA- or APA-accredited program. The successful candidate should also be registered or be eligible for registration with the Saskatchewan College of Psychologists. Area of research specialization is open for this position. Anticipated date of **commencement is July 1, 2019**, depending on the availability of the successful candidate.

VOLUNTEER AND JOB OPPORTUNITIES Continued...

Duties of the successful applicant will include teaching a course in Health Psychology, and also supervision of clinical psychology graduate students on practica. The successful candidate may also teach other courses in their own areas of interest, or as department needs arise. Review of applications will begin **March 15** and will continue until the position is filled. For more [information](#).

The **Leonard Krasner Psychological Center (KPC)** and the **Mind Body Clinical Research Center (MB-CRC)** in the Departments of Psychology and Psychiatry (respectively) at **Stony Brook University** seek **3 full-time Adult-focused Postdoctoral Fellows and 1 Child/Adolescent-focused Postdoctoral Fellow** to provide outpatient and inpatient clinical services. Outpatient psychotherapy services include: assessment, consultation, and provision of time-limited evidence-based interventions (e.g., Cognitive Behavioral Therapy). Inpatient clinical services will include working as part of an interdisciplinary team in either the psychiatric emergency department, consultation and liaison service, adult inpatient unit, or the child inpatient unit. Additional activities will include: providing support for ongoing research studies, assisting with training activities, and providing supervision to pre-doctoral psychology interns and externs. Postdocs may also participate in our comprehensive Dialectical Behavior Therapy Program (i.e., skills training, consultation team, and skill coaching). Additional training opportunities are available in mindfulness-based and behavioral health interventions. One position will have a translational research emphasis. Mentorship will be provided in grantsmanship and research program development. Research responsibilities will include data management and analysis, preparing manuscripts, and writing grants, among other activities. Ongoing research projects include a NASA-funded RCT aimed at evaluating the provision of time-delayed psychotherapy and an NIH-funded trial examining a novel online stress-management program for pregnant women.

Clinical-Postdoc Activities will include:

- 75%-Providing evidenced-based psychotherapy services (CBT/DBT/ACT)
- 15%-Supervision, Training and Supervising trainees
- 5%-Research activities
- 5%-Other duties as assigned

Research-Postdoc Activities will include:

- 40%-Providing evidenced-based psychotherapy services (CBT/DBT/ACT)
- 40%-Research activities (including manuscripts and grants)
- 15%-Supervision, Training and Supervising trainees
- 5%-Other duties as assigned

Required Qualifications:

Doctoral Degree in clinical psychology; Demonstrated experience in providing cognitive behavioral and/or third-wave treatments (e.g., mindfulness, dialectical behavior therapy (DBT), acceptance and commitment therapy); Publication(s).

Preferred Qualifications:

Experience with providing hospital-based psychological services.
 Broad-based clinical research experience with adults and/or children/adolescents.
 Experience with supervising support staff and/or trainees.
 Experience leading/co-leading DBT skills groups
 Experience with grant and manuscript writing.
 Experience with trauma-related research and treatment.
 Minimum 2 first authored publications.

Start date: August 1st, 2019. Accepting applications now until positions are filled.

Please email a cover letter, current CV and 2 letters of recommendation to Drs. Dina Vivian (dina.vivian@stonybrook.edu) and Adam Gonzalez (adam.gonzalez@stonybrook.edu).

Please visit our [website](#) for additional details.

Eric Garland, PhD, Director of the **Center on Mindfulness and Integrative Health Intervention Development (C-MIIND)**, is seeking **postdoctoral fellows** to support federally-funded, biobehavioral clinical research on mindfulness-based interventions for chronic pain and prescription opioid misuse at C-MIIND, which currently oversees more than \$40 million in grants funded by the National Institutes of Health (NIH), Department of Defense (DOD), and Patient Centered Outcomes Research Institute (PCORI). In particular, fellows will help conduct randomized clinical trials (RCTs) and psychophysiological research on Mindfulness-Oriented Recovery Enhancement (MORE), a manualized intervention for addiction, stress-related conditions, and chronic pain. For additional information on MORE and current research, see www.dreericgarland.com.

Postdoctoral fellows will assist with the following duties: a) manuscript preparation from existing datasets; b) clinical data collection; c) psychophysiological data collection (autonomic, EEG, and fMRI measures); d) data analysis; and e) designing and implementing new translational research studies. If the postdoctoral fellow has a clinical background, the postdoc may deliver mindfulness, CBT, and other behavioral interventions. Fellows will also have opportunities to coauthor multiple scientific articles from existing primary datasets and write federal grants leveraging the resources and interdisciplinary connections of the College of Social Work, which extend into Psychiatry, Psychology, Neuroscience, Oncology, Public Health, Anesthesiology, Family Medicine, and Nursing, among other departments.

VOLUNTEER AND JOB OPPORTUNITIES Continued...

Dr. Garland is seeking fellows with a PhD in Clinical Psychology, Health Psychology, Behavioral Medicine, Social Work, Nursing, or a related discipline. Research-oriented MDs or DOs are also welcomed. Applicants must have good scientific writing skills with a solid publication record, clinical research experience, and strong quantitative data analytic skills.

Applicants with clinical research or clinical experience (e.g., mental health, addiction, and/or chronic pain populations), previous experience with mindfulness, psychophysiological data collection/analysis (e.g., EEG, HRV, fMRI, eye tracking, etc.), and/or previous study coordination experience on federally-funded studies will be given preference.

As a major research and teaching university—and the flagship of the Utah System of Higher Education—the University of Utah strives to create an academic environment in which the highest standards of scholarship, professional practice and teaching are observed. The University is located in Salt Lake City, at the base of the Wasatch Mountains, providing ready access to world class outdoor recreational opportunities.

The Center on Mindfulness and Integrative Health Intervention Development at the University of Utah has a number of excellent research facilities, including the state-of-the-art Bridge Training Clinic, consisting of four therapy rooms with one-way mirrors and videotaping capacity for behavioral observation and coding, as well as a complete psychophysiological laboratory for assessment of neurocognitive and neuroaffective mechanisms of therapeutic change.

Review of applications will begin immediately and the position will be open until filled. Applicants should provide cover letter, curriculum vitae, list of three professional references, and published writing sample(s).

Inquiries regarding the position may be directed to Dr. Eric Garland, PhD, at eric.garland@socwk.utah.edu, 801-581-3826.

The **Department of Psychology at Wilfrid Laurier University** invites applications for a tenure track (or tenured) open rank appointment in the **Community Psychology Area** beginning **July 1, 2019**, subject to budgetary approval. The successful candidate will be a community-engaged scholar who is involved in addressing important social issues. The ideal applicant will have a strong commitment to teaching and is actively researching in one or ideally the intersection of at least two of the following five areas:

- Aging
- Community mental health
- Critical disabilities studies
- Health and wellbeing of Indigenous communities
- Immigration

The ideal candidate is a scholar who will contribute to teaching at the undergraduate, masters, and doctoral levels; as well as supervising graduate students in the MA and PhD programs. Applicants should have a PhD in community psychology (or related psychology fields such as health psychology and applied social psychology), an active research program with evidence of research excellence, an established track record of securing research funding or strong potential to attract external funding, and a commitment to mentorship and teaching.

Applicants should send: a curriculum vitae; copies of three publications, preprints, or other scholarly contributions (e.g. relevant literary or technical reports such as community manuals may also be considered); a statement of current and prospective research interests; a statement regarding teaching experience and interests; and contact information for at least three referees to:

Dr. Rudy Eikelboom, Chair, Department of Psychology, Wilfrid Laurier University, Waterloo, Ontario, Canada N2L 3C5, c/o Lucy Carreiro (email: lcarreiro@wlu.ca). Electronic submission of applications is preferred. Applications will be accepted until **February 28, 2019** at 11:59 p.m.

Applicants can learn more about the Department at: <https://students.wlu.ca/programs/science/psychology/index.html>, and about the Laurier Centre for Community Research, Learning and Action at: <https://researchcentres.wlu.ca/ccrla/index.html>

The **Yale Psychology Department** is pleased to announce **two postdoctoral scholar positions** in honor of Professor Susan Nolen-Hoeksema that have been endowed by her husband, Richard Nolen-Hoeksema. Each *Susan Nolen-Hoeksema Postdoctoral Associate in Integrative Psychology* is for a two-year period, with appointments staggered such that only one position turns over in a given year. Eligible applicants must have a PhD in Psychology or a related field by June 30 of the year in which the appointment begins. Applications in any area of psychology are encouraged, especially from candidates with research interests that are integrative across areas and levels of analysis and applicable to one or more domains of psychopathology or its treatment (i.e., areas in which Professor Nolen-Hoeksema took special interest). Applicants for the initial position, to begin July 1, 2019, should identify one or more Yale faculty members with whom they desire to work during the term of the appointment, and include a personal statement, curriculum vitae, reprints of selected papers, and letters of recommendation from two to three individuals familiar with the applicant's research background and promise. These materials can be addressed to the Chair of the Susan Nolen-Hoeksema Fellowship Committee and sent by email to Jessica Hermann (jessica.hermann@yale.edu).

The **Department of Psychiatry, Division of Adult Psychiatry**, is seeking **full-time clinical psychologists** to work in our Acceptance and Mindfulness-Based Adult Partial Hospital Program (PHP) at **Rhode Island Hospital**. The PHP serves adults aged 18 years and older who present with a range of psychological problems, including mood and anxiety disorders, substance use disorders, and personality disorders. Psychologists in the PHP provide daily individual and group psychotherapy, based on Acceptance and Commitment Therapy and other third wave behavioral and mindfulness-based therapies. Psychologists at the program work in close collaboration with other members of

VOLUNTEER AND JOB OPPORTUNITIES Continued...

the multi-disciplinary team. In addition, there is time for psychologists to see outpatients and/or conduct clinical research, as desired by the candidate. Psychologists may also have the opportunity to be involved in training and/or supervision of psychology or medical residents or fellows affiliated with the Warren Alpert Medical School, Brown University. A clinical faculty appointment may be available for a candidate that meets the criteria. Qualifications include completion of a doctorate in Clinical Psychology and an APA-accredited internship, licensure/license-eligibility in Rhode Island, and experience or interest in acceptance and mindfulness-based therapies. Although the position is primarily clinical, the PHP is a clinical research program specializing in the study of diagnostic assessment, measure development/validation, and treatment outcomes, and thus we particularly welcome applicants with expertise or interest in conducting clinical research. Salary and benefits are competitive and commensurate with level of training and experience. In addition to a supportive and collaborative work environment, we offer an excellent benefits package including medical, dental, disability, and life insurance, retirement benefits, malpractice insurance, legal/risk management consultation, and a professional allowance. Please send a CV along with a letter of interest to Kristy Dalrymple, Ph.D., Director of Adult Psychology, via email (kristy_dalrymple@brown.edu).

The **Department of Psychology at the Harvard University** invites applications for a **post-doctoral fellow** to begin in summer or fall 2019. This position will be based in the Stress and Development Lab, led by Katie McLaughlin. Our research examines the impact of environmental experience on children's development and aims to identify mechanisms linking experiences of adversity to the onset of psychopathology. This post-doctoral position will focus on translating knowledge about mechanisms linking childhood trauma to the onset of psychopathology into an early intervention program targeting those mechanisms. Specific activities will include intervention development, building relationships with relevant community partners, and grant writing in addition to leading independent research. The post-doctoral fellow will be based in the Stress and Development Lab but will work on an intervention development project in collaboration with John Weisz and the Laboratory for Youth Mental Health at Harvard. Data from both labs will be available to the fellow for use in his or her own research. Candidates will have a doctoral degree in clinical psychology, or a related area. Strong candidates will have a track record of clinical research, experience in intervention development, interest or expertise in the consequences of early-life adversity, the ability to effectively manage a research team, and experience working with children and adolescents. Please send a curriculum vitae and contact information for three references to Katie McLaughlin (kmclaughlin@fas.harvard.edu) to apply.

The **Developmental Neuroimaging Lab** at the **Alberta Children's Hospital** is looking for **volunteers** who are interested in gaining research experience while supporting the lab with a variety of tasks. The overarching goal of the research in our lab is to provide a better understanding of brain structure, function, and plasticity with the hope of improving, delivering, and monitoring treatment for children with learning and behavioral challenges.

We are looking for volunteers who will be able to work approximately 5-8hrs/week. The role will include, data entry, scoring questionnaires, preparation of materials for participant visits, assisting with a MOCK MRI study with possible room for growth.

We are seeking individuals who are reliable, self-motivated, team-oriented, enthusiastic about research, and possess excellent communication and analytical skills. Previous experience as a research assistant is ideal. Students interested in pursuing a career in the social and health sciences (clinical psychology, medical school, nursing, speech and language pathology, etc.) are particularly encouraged to apply.

Interested candidates should email their CV, transcript and a brief statement of interest to brainmri@ucalgary.ca. Students that appear to be a fit will be contacted by phone for interview.

For more info about our lab check out, <https://www.developmentalneuroimaginglab.ca/>
