To Register: https://ucalgary.zoom.us/meeting/register/tJYsdOGppj0oHtQl8jIQSqViHp3PxpYZ0Yni
Description: Git is an open-source version control system used extensively for managing projects, but can feel complicated to set up for beginners. In this workshop, you will learn the basics of Git, Github, and R. It will be a practical hands-on workshop where we'll go through the learning process together.
Topics include:
What is Git?
Why do you need Git & Github?
What kind of project is it used for?
How does Git work?
How does it work with R & R studio?
P.S. There will be snacks!

UCalgary Indigenized Campus Open Houses

Who: All students, faculty and staff

In 2017, UCalgary launched ii' taa'poh'top, its campus-wide Indigenous Strategy. Over the past six years, spaces and places throughout UCalgary campuses have transformed or been developed to align with ii' taa'poh'top's goals of ensuring Indigenous students, faculty, staff, and guests – particularly Treaty 7 relatives, know and feel that they belong here. UCalgary's Indigenized Campus Map and Online Guidesite, an ii' taa'poh'top Intercultural Capacity Building Grant-funded project, connects the people and places dedicated to forwarding ii' taa'poh'top through visual art and virtual communication.

To celebrate this project's launch, the UCalgary Indigenized Campus Map project team is hosting a series of Open Houses in Indigenous specific spaces across campus between January 23-31. We hope you can join us for snacks, connection, and community!

We're excited to get to work and can't wait to tell you about our project. We also want to hear your ideas! What needs to be on the map?
