

RESTRICTED MATERIALS

- 1) **Only alcohol-based and water-based materials may be used in classrooms, offices, and studios that do not have external ventilation.**
- 2) **Glues, resins, paints, varnishes, stains, inks, and cleaning agents that use as their solvent or are composed of oils, mineral spirits, or turpentine** may only be used in externally-vented areas. These locations are limited to the painting studios (AB 792 and AB 721), spray booths (AB 721A and AB 694), and the printmaking studios (AB 747, 770 and 771.)
- 3) **Materials of any sort that use as their solvent or are composed of substances other than water, alcohol, oil, mineral spirits, or turpentine are RESTRICTED.** Such materials must be reviewed by Department of Art technicians and/or the University of Calgary's Environmental Health & Safety office ***before use in the Department.*** These material reviews ensure that the proper hazard information is made available and that procedures for use are established. Such materials may also require special storage measures or may be too dangerous to be used in this facility.
- 4) **Technicians MUST be advised BEFORE any corrosives, driers, explosives, fuels or unapproved solvents are used in the Department.** Fuels such as gasoline and kerosene (or white gas) are not to be used as solvents.
- 5) **All BIOLOGICAL materials such as human, animal, and plant fluids, excrement or other remains are considered RESTRICTED.** They must be approved by the Department of Art technicians and the University *before use in the Department.*
- 6) **Sprayed substances – including paints, glues, varnishes, stains, and fixatives may NOT be used in any studios, shops, classrooms, or hallways.** They may only be used in the spray booths in rooms AB694 and AB721A. Follow instructions on posted notices and consult a technician before beginning.
